FABER

**SPECIAL ANNIVERSARY
 PROMOTION
 CELEBRATE WITH FABER!**

Valid to: 31.12.2015

60 YEARS

OF ITALIAN DESIGN, HIGH TECHNOLOGIES AND REMARKABLE INNOVATIONS BY FABER.

This is a story about the spirit and passion for innovations that brings us back to the eternal traditions of supreme quality and high standards of all products "made in Italy". This is a story, in which Faber has repeatedly proven to be "the one" that dictates the latest design trends in the world of cooker hoods and in which the company does not stop expressing its unfading pursuit for technologies of the future.

Still in the past 1955, in the little Italian town of Fabriano, Abramo Galassi founded the Faber Plast company (specialized in processing plastic materials and synthetic resins). Three years later, the Founder of Faber started writing the history of one of the most revolutionary electrical appliances ever created – the cooker hood. This completely new home appliance has changed forever the perception of people living all around the world for one of the most important spots at home – the Kitchen.

Today, after sixty years of stable growth and international success, Faber works on 4 continents, produces more than three million hoods per year and has 7 production plants positioned in 7 different countries.

In connection with the celebration of Faber, Leks Group is pleased to present to its customers a special anniversary promotion, with the participation of the best - selling models of cooker hoods under the brand Faber.

→ VALUE PB A60 X

*Classic chimney cooker hood

PROMOTIONAL GIFT

→ ALUMINIUM FLEXIBLE DUCT

Length – 150 cm, Ø 120 mm

MAIN CHARACTERISTICS

	Capacity 420 m³/h according to European standard EN 61591
	Double turbine motor
	Push buttons control
	Minimal noise level according to EN 60704-3 – 52dB(A)
	Lighting – 2x28W
	Metal-cassette filters

SPEED	1	2	3
M³/H	230	310	420
PA	170	210	230
W	70	100	135
dB(A)	52	59	64

→ FLEXA M6 AM/X A60

*Built-in telescopic cooker hood

PROMOTIONAL GIFT

→ ALUMINIUM FLEXIBLE DUCT

Length – 150 cm, Ø 120 mm

MAIN CHARACTERISTICS

	Capacity 400 m³/h according to European standard EN 61591
	Double turbine motor
	Electromechanical control SG sliders
	Minimal noise level according to EN 60704-3 – 50dB(A)
	Lighting – 2x28W
	Metal-cassette filters

SPEED	1	2	3
M³/H	190	250	400
PA	140	160	180
W	65	90	125
dB(A)	50	56	62
